Oshani Seneviratne
Ph.D. Student, DIG, CSAIL
Ralph Swick
COO, W3C

ORGANIZERS:

Jose Pacheco
MIT Entrepreneurship Center
Chris Mather
MIT Sloan, MBA '10

What is this course about?

- One week immersive IAP lab Jan 11 – Jan 19
- Includes lectures by experts in the field on key linked data concepts and technologies
- Sir Tim Berners-Lee, creator of the World Wide Web, kicks off the week with his vision of Linked Data, the means for unlocking the greater power of the Web
- Participants form multi-disciplinary teams of coders and entrepreneurs for a collaborative week supported by coaches with expertise in Semantic Web, Linked Data, product design, entrepreneurship, Web services and mobile applications
- Working prototypes will be evaluated by a blue ribbon panel at the end of the course

What might result from taking the course?

- Your team's result from this hack-athon could be a working prototype for an open source project to change the world, entry in the \$100K competition or founding a new business

How do I sign up?

- Details at:
<http://dig.csail.mit.edu/2010/LinkedData/KillerApp.pdf>
- Email to iapsemantic@mitcenter.org
- Open to Web coders and those with entrepreneurial spirit
- Apply by December 24
